SAFEMEZZ® HORIZONTAL GATE (MGH)

Durable, Flexible Safety For Your Mezzanine

The SafeMezz® Horizontal Gate keeps your employees safe from dangerous falls and improves the efficiency of your material handling. Once installed on a mezzanine, this gate slides open and slides closed as needed, allowing you to forklift materials to your elevated space while protecting your crew. It's ideal for mezzanine openings with limited headroom, pallet racking areas, warehouses and picking/packing areas.

Improves Employee Safety - Meets OSHA standards 1910.28 and 1910.29, and includes 4" toeboard.

Durable Construction - Heavy-duty 1.5" X 1.5" 11-gauge square tube gate construction with a long-lasting, powder coat safety yellow finish (custom stainless steel finish available).

Easy Operation - Opens by manual or automated operation; activate the gate with the push of a button or by the pull of a cord.

Versatile Installation - Available in two stock sizes with custom widths up to 12' as well as on-deck or off-deck mounting options.

Additional SAFEMEZZ® Gate Options

SAFEMEZZ360™

SAFEMEZZ®
VERTICAL GATE

SAFEMEZZ®
DOWNWARD GATE

In applications where the product is positioned to protect a fall edge, the person operating the product is required to implement another primary means of fall protection whenever the product is not closed.
